

VideoManager

An on-premises or cloud deployment that fits your public safety needs

No two organisations are alike, we know you have unique networking and architectural requirements for your body camera and in-car video programs.

Maybe you're in a rural area with poor internet connectivity. Or perhaps you don't have a dedicated IT department. Whatever your specific needs, we designed our device and footage handling software, VideoManager, to work seamlessly in the cloud or on-premises - so you can manage your devices where, and how you want.

For ease of deployment and maintenance, use a cloud subscription on a monthly rolling basis: your users can access VideoManager like any other web service, while we take care of security and storage. With cloud, you'll also get immediate access to the newest features without giving more work to your IT staff. Alternatively, if you have particularly stringent security requirements, install on-premises and bring your own storage; VideoManager can be housed entirely within your organisation's intranet.

Whether you have one device or 10,000, VideoManager's flexibility and scalability - in the cloud or on-premises has you covered.

Cloud

Receive the latest software and firmware updates, managed on your behalf, so you have the most powerful solution with the least maintenance.

On-Premises

Bring your own storage and servers for complete control over your sensitive data, with a perpetual licence for permanent ownership.

Device Licenses

VideoManager requires one device licence for every body camera or in-car video system in your fleet. The cloud deployment option also requires storage to be purchased. In addition to enabling your devices to work with VideoManager, these licences also enable the following functionality.

FEATURE	
Body camera or in-car video system management	Administer your suite of body cameras and in-car video systems. This includes assigning devices to ensure that all recorded footage can be traced back to a specific user, and upgrading devices to the most recent firmware. Customise a wide range of recording behaviour including recording alerts and video resolution.
User management	Manage and streamline your workers' access to VideoManager using granular permissions, groups, and roles. Meet your organisation's security policies with comprehensive password policies, automatic account locking after incorrect password entries and two-factor authentication.
Single sign-on integrations	Add single sign-on integrations for seamless user authentication. VideoManager supports OAuth2.0, Windows Authentication and SAML integrations, and optional user provisioning on first login.
Incidents	Group footage from body cameras, in-car video systems and other imported media into evidence bundles. Clip and redact media in line with evidentiary requirements, and then share or export.
Media import	One user per device licence can import external media - including PDF, MP4, JPG, and PNGs - into VideoManager. You can then process, redact, and handle this media in the same manner as body camera or in-car video system footage.
Customisable media properties	Meet your organisation's media categorisation requirements with VideoManager's powerful custom fields (including dropdowns, checkboxes, and date/time fields).
Streaming	Stream live footage from your body cameras and in-car video systems back to VideoManager, or a third-party ONVIF-compliant Video Management System (VMS); for example, Avigilon Unity.
Reports	Collate information about high-level system parameters - such as user behaviour, camera field trips and equipment availability - into one downloadable CSV file.
App support	Watch and categorise body camera footage securely while still in the field using the SmartControl Android or iOS app. Once your body camera is redocked, all footage is automatically and securely offloaded to VideoManager.

Device license categories supported by VideoManager: V series, VB series, VT series, M series, and SVX.

On-premises and cloud tiers

Choose the features which are relevant to your organisation, by choosing which tier works best for you. On-premise licenses are perpetual (excluding software assurance), and cloud licenses are per device per month, billed annually.

FEATURE		ON-PREMISES		CLOUD	
		HQ BASE	HQ PRO	STANDARD	PLUS
Hierarchical architecture	Enables complex architecture: one instance of VideoManager controls key configurations, while other instances connect to it as sites.	✓	✓	✓	✓
Streaming server export	Simultaneously stream footage to a cloud VideoManager instance and download footage to an on-premises VideoManager instance.	✓	✓	✓	✓
Identity management	Export a VideoManager user list with one click, then easily modify and re-import, or quickly migrate to another instance.	✓	✓	✓	✓
User import tool	Automatically sync your existing user database with VideoManager to easily manage joiners and leavers. Compatible with Microsoft Entra ID™.	✓	✓	✓	✓
Composite clips	Compile parallel viewpoints of an event from different body cameras or in-car video systems into one video to playback simultaneously.	✓	✓	✓	✓
Antivirus integration	Prevent unauthorised media from entering the system - scan for viruses in conjunction with a customer-provided OPSWAT™ service.	✓	✓	✓	✓
Media preparations	Redact and annotate media outside of an incident. This includes blurring, pixelation, zooming, transcribing and cropping.	✓	✓	✓	✓

On-premises and cloud tiers (cont.)

FEATURE		ON-PREMISES		CLOUD	
		HQ BASE	HQ PRO	STANDARD	PLUS
Notifications	Send emails or SMS messages to selected users when specific actions occur, such as a live stream starting or a new user logging in.		✓	✓	✓
Self-service user creation	Enable users to create their own profiles on VideoManager via organisational email addresses.		✓	✓	✓
Nested incidents	Collate multiple incidents into an incident collection, then share and edit like a normal incident.		✓		✓
Tactical VideoManager	View the location of connected body cameras and in-car video systems in real time on a customer-provided Esri™ ArcGIS™ map.		✓		✓
Resilient touch assign	Assign cameras using Touch Assign even during network outages.		✓		✓
Redaction Assist	Redact sensitive information from videos and transcripts assisted by AI.				✓

On-premises additional licences

PART CODE	DESCRIPTION
VM-EPL-3PVMS	Enables VideoManager integration with third-party VMSs which are not compliant with ONVIF. One licence is required for every site which will be passing streams to a third-party VMS.
VM-EPL-STORE-1TB	Enables use of VideoManager with customer-provided Amazon S3™ or Microsoft Azure Blob™ storage. One licence is required for each TB of storage.
AM-EPL-1	Media user license - enables a user to import external media into VideoManager. This feature is included with device licenses, this license can be used when extra import users are required above the number of purchased device licenses.

On-premises software assurance

By default, every VideoManager on-premises licence comes with 12 months of Software Assurance. This grants you access to phone/email support and VideoManager releases within that period. You can also add extra Software Assurance to your licence(s), to ensure your organisation always has the most up-to-date software with the newest features.

PART CODE	DESCRIPTION
VM-ESA-VB-12/24M-1	Extra 12 or 24 months of Software Assurance for a VB-series licence.
VM-ESA-VT-12/24M-1	Extra 12 or 24 months of Software Assurance for a VT-series licence.
VM-ESA-HQ-BASE-12M	SW Assurance: +12 months for VideoManager HQ Base
VM-ESA-HQ-BASE-24M	SW Assurance: +24 months for VideoManager HQ Base
VM-ESA-HQ-BASE-48M	SW Assurance: +48 months for VideoManager HQ Base
VM-ESA-HQ-PRO-12M	SW Assurance: +12 months for VideoManager HQ Pro
VM-ESA-HQ-PRO-24M	SW Assurance: +24 months for VideoManager HQ Pro
VM-ESA-HQ-PRO-48M	SW Assurance: +48 months for VideoManager HQ Pro
VM-ESA-STORE1TB12M	SW Assurance: +12 months for VideoManager ObjectStorage 1TB
VM-ESA-STORE1TB24M	SW Assurance: +24 months for VideoManager ObjectStorage 1TB
VM-ESA-STORE1TB48M	SW Assurance: +48 months for VideoManager ObjectStorage 1TB
VM-ESA-V-12M-1	SW Assurance: +12 months for 1x V series licence
VM-ESA-V-24M-1	SW Assurance: 24 months for 1x V series licence
VM-ESA-V-36M-1	SW Assurance: 36 months for 1x V series licence
VM-ESA-V-48M-1	SW Assurance: 48 months for 1x V series licence
VM-ESA-VB-12M-1	SW Assurance: +12 months for 1x VB series licence
VM-ESA-VB-24M-1	SW Assurance: +24 months for 1x VB series licence
VM-ESA-VB-36M-1	SW Assurance: +36 months for 1x VB series license
VM-ESA-VB-48M	SW Assurance: +48 months for 1x VB series license
VM-ESA-VT-12M-1	SW Assurance: +12 months for 1x VT series license
VM-ESA-VT-24M-1	SW Assurance: +24 months for 1x VT series license
VM-ESA-SVX-12M	SW Assurance: +12 months for SVX camera license
VM-ESA-SVX-24M	SW Assurance: +24 months for SVX camera license
VM-ESA-SVX-36M	SW Assurance: +36 months for SVX camera license

On-premises software assurance (cont.)

PART CODE	DESCRIPTION
VM-ESA-3PVMS-12M	SW Assurance: +12 months for VideoManager 3rd-party VMS
VM-ESA-3PVMS-24M	SW Assurance: +24 months for VideoManager 3rd-party VMS
AM-ESA-12M	SW Assurance: +12 months for 1x Media User licence
AM-ESA-24M	SW Assurance: +24 months for 1x Media User licence

Cloud storage service

These services determine how much storage you will have for your VideoManager cloud instance - so you can keep what you need, for as long as you need it. Pay per GB or TB, per month.

DEPLOYMENT	DESCRIPTION
SV-STORE-1GB-1M-UK	1GB of storage per month.
SV-STORE-1TB-1M/UK	1TB of storage per month.
